

Course Information:

Dates and Time:

September 1st through December 1, 2021. There will be 13 class sessions. All classes will be held from 6 pm to 9 pm, and are on Wednesday evenings.

Location:

The location at this time is undetermined. It may be ZOOM or in person. A decision will be made closer to the start of classes and the information for the classes will be emailed to you.

Fees:

\$400.00 Payment must be made or a Purchase Order received in advance of the first class. Please go to :

<https://ctpa.org/arboriculture-101-registration/> and enroll online. If you would like to send in a check, please fill out the attached enrollment form and mail it, along with a check, to CTPA.

Class Size:

The class will be limited to 40 students, on a first paid, first served basis. Town employees may reserve a place by sending a Purchase Order. Those not admitted into this class will be placed on a notification list for the next class, to be held beginning in January 2022.

Texts:

National Pesticide Applicator Certification Core Manual. Also known as the National Core Manual is available through the CTPA for an additional cost of \$25.00

Additional texts are suggested and include:

Pirone's Tree Maintenance, Hartman, Pirone and Sall, 7th edition, Oxford Press 2000.

(Available from most bookstores - may need to be special ordered.)

If we are not able to meeting in person due to the COVID restrictions for the fall 2021 session, Arboriculture 101 will be given virtually – that is, by means of the computer, using Zoom software. While we would prefer not to have to give the class this way, it is what we have to do given the current situation. At the same time, we want to help each one of you as you move along in your careers. We can make it work!

To take Arboriculture 101 via ZOOM, you will need access to a good computer, on which you will need to download the free ZOOM software (instructions will be sent). You will also need to have a reliable internet connection, so that you can participate in the live classes. Classes will be held once a week, on Wednesday evenings, for 3 hours. It would be best if you would have a quiet place where you could sit for 3 hours with the computer, undisturbed.

It is possible to use your cell phone or a tablet to participate in the classes. However, we will be showing a lot of slides. Being able to see them on the screen is important.

All classes will be recorded for later viewing.

For you to register for this class, it is important that you send us a reliable e-mail address and a regular mailing address. The e-mail address is important so that we can keep you updated. We need the regular mailing address in order to send you your books.

Thanks. We will make this a great class!

Announcing:

the

Fall 2021

Session of

ARBORICULTURE

101

A course for those wishing to advance in the field of arboriculture and to prepare for the Connecticut Arborist License exam

Presented by
**The Connecticut Tree
Protective Association**
with the assistance of
**The Connecticut Agricultural
Experiment Station**

Arboriculture 101

presented by
the Connecticut Tree Protective Association

This course is intended to provide the successful graduate with the basic information essential to a career in arboriculture. Students who attend class, read the assigned materials and work with the instructors can also expect to do well on Connecticut's Arborist Licensing Exam. However, the course's main goal is to provide that foundation that will assist individuals as they move forward in a career in arboriculture.

In order to get the most from the course, students must make a commitment to studying. They must spend the time and effort needed to learn the covered material. Readings are assigned in advance of each class. Students are expected to complete these reading assignments.

The instructors are drawn from throughout Connecticut's tree care industry. Also included are several scientists from the Connecticut Agricultural Experiment Station. This variety in instruction is one of the key strengths of the course.

Please note - CTPA does not administer the Arborist Exam. That is done independently by the Department of Energy and Environmental Protection and the Tree Protection Examining Board. However, CTPA works closely with both groups to ensure that the material delivered in this course is appropriate to the exam.

TENTATIVE COURSE OUTLINE

(Dates that the class will meet are in parentheses. All classes meet from 6-9 pm. The final outline will be mailed out prior to the first class. If needed, make-up dates due to weather will be arranged.)
