

Protect Your Ash

From the Invasive, Exotic Emerald Ash Borer

The Emerald Ash Borer is a damaging insect that is in the process of moving through Connecticut, devastating ash trees as it goes.

The Connecticut Tree Protective Association is offering a full day workshop for professionals and homeowners who wish to know more about the emerald ash borer. The workshop will include details on identifying the insect and the damage it does and on protecting ash trees in the presence of this insect. A field tour is included. Arborists, tree wardens, landscape professionals and homeowners are all invited.
