

The Connecticut Tree Protective Association presents: Connecticut Tree Conditions in 2023

In this workshop, there are three elements that will be discussed about CT tree conditions in 2023. The first talk is about Weather, Climate and the Environmental Outlook of CT Trees by Dr. Keriö. The second talk is Plant Pathology and Projections by Felicia Millett. And the last talk will discuss entomology by Dr. Rutledge. After Lunch (provided), there will be a three panel question and answer session with the speakers.
